SKM Power*Tools
ELECTRICAL ENGINEERING SOFTWARE

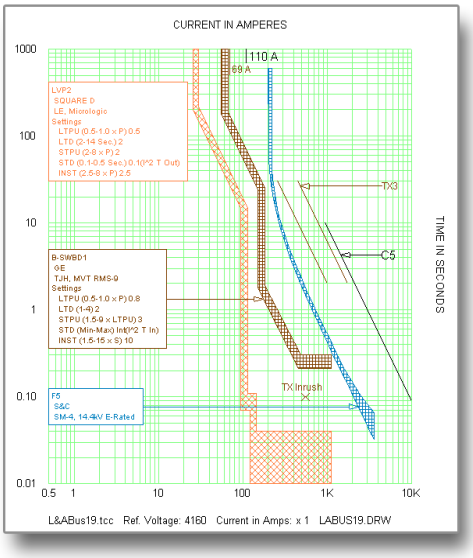

PTW Viewer

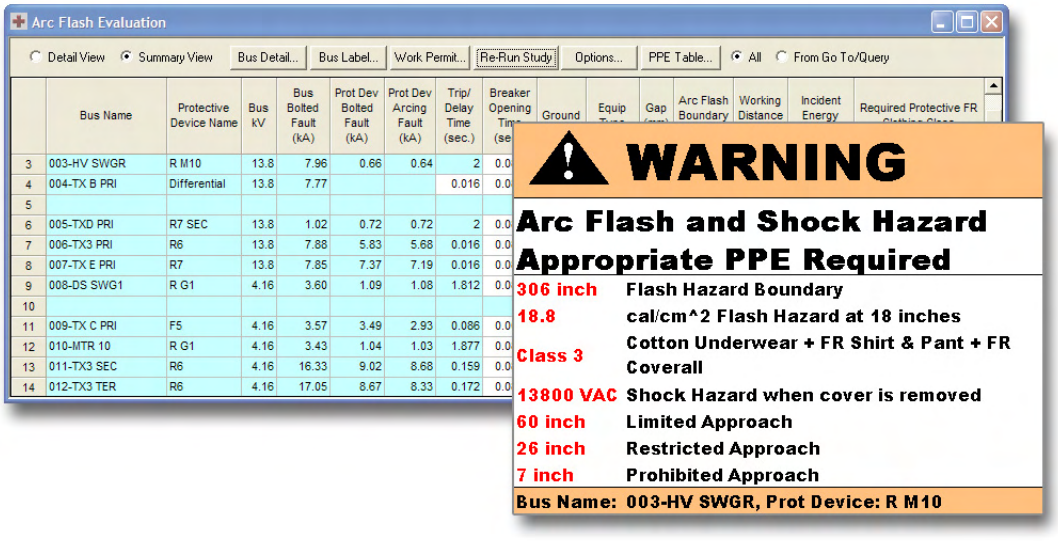

NEW!

PTW Viewer is the perfect tool to provide an interactive electrical model to your customers. Rather than paging through long reports, your customers can display results on the interactive one-line, view time-current curves, print arc flash labels, and many other activities. With the Viewer there is no chance of inadvertent modifications to the power system model.

Key Features

- Open, view, print, and export all study results from any project without a full version of PTW.
- Create new one-lines from existing components and expand the one-lines.
- Modify or create new datablocks and apply them to any one-line and TCC.
- Adjust component position in existing one-lines and add annotations.
- View different scenarios created from the base project and compare the results of mulitple scenarios in the Data Visualizer.
- Create customized Arc Flash labels, print Warning Labels and Work Permits.

SKM Systems Analysis, Inc. Presents PTW Viewer!

PRICE $995
Receive a $200 credit when upgrading to a full PTW software package within 3 months of the PTW Viewer purchase.

Since 1972, SKM Systems Analysis, Inc. has been the leader in the electrical engineering software industry, providing quality software, training and support to thousands of satisfied customers throughout the world.

Subscribe to our Newsletter at www.skm.com and receive a free Arc Flash Educational Video!

SKM Power*Tools
ELECTRICAL ENGINEERING SOFTWARE

PTW Viewer

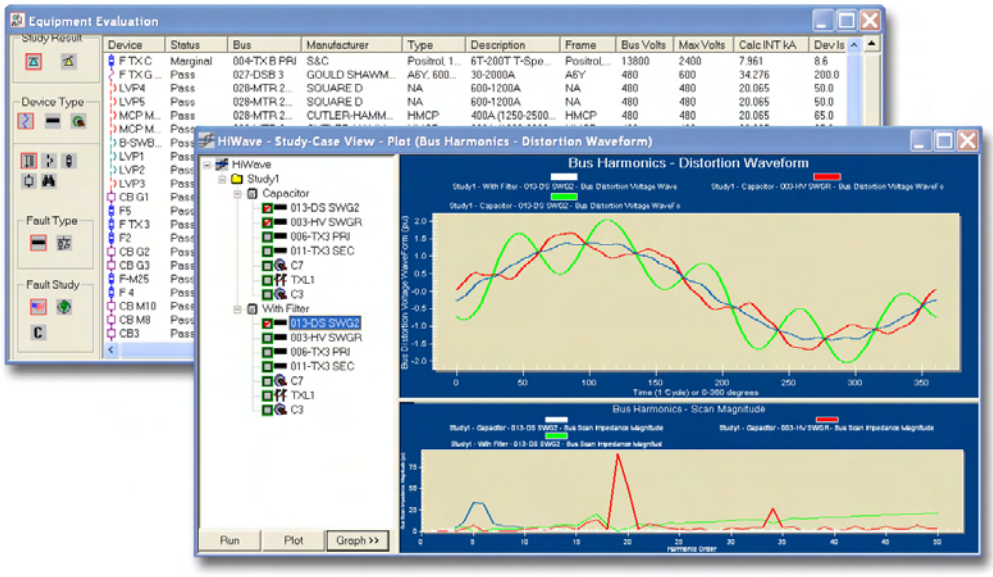

NEW!

Key Features (continued)

- Access to the Component Editor to view specifications of each component for all designs and projects.

- View tabular and graphical representations of completed studies.

PTW Viewer is a tool that can be used by anyone to easily grasp the content of an existing power system model without having to purchase the full PTW software package!

Note: DC Arc Flash results are not available with PTW Viewer and will require purchase of the full version of the software. Contact us for pricing.

What some of our clients are saying about PTW:

"We have found PTW to be a high quality, efficient, easy-to-use product which gives accurate results in a variety of professional presentation formats."
-Ampcontrol

"...we have found SKM software to be an indisposable tool in our work, saving us time."
-Susan Schiller, P.E.
(Industrial Design Corp.)

"The program is very simplistic and intuitive, and yet can handle projects of any size and complexity, while conforming to all relevant standards."
-David W. Simes, P.E.
(Simes & Rosch Engineering)
